

TRANSFER CHAIR

HUMAN CARE
Your Life. Your Way.

Chair & Transfer Device in one!

1

Place the chair by bed in stretcher position.

2

Attach bed sheet to transfer bar.

3

Transfer patient by turning handle.

4

Incline chair and you're ready to go!

The convertible chair allows one single caregiver to perform safe patient transfers, helping reduce the risk of injury for both patient and caregiver. "

Patient Transfer System

Our Patient Transfer System (PTS) offers a multitude of capabilities within a single product. Designed to allow a single caregiver to easily and safely transfer, transport and reposition a patient, the chair can perform the functions of transfer system, stretcher, mobile chair, and custom seating.

Who Qualifies For The Patient Transfer System?

- Patient requires a transfer between bed and either a chair, wheelchair or commode
- Without the use of a sling lift, patient is bed-confined
- Patient requires supine/lateral transfers
- Patient must be non-weight bearing

- Alzheimer's/Dementia
- Amputations (AKA, BKA)
- Multiple Sclerosis (MS)
- Joint Contractures
- Decubitus Ulcers (Stage II or greater)
- Stroke
- Paralysis

*Please note these are just some of the common diagnoses. More will qualify.
